Rohit Geddam

Full-Stack Developer

Navi Mumbai, India | +91 79772 50075 | rohitgeddam0@gmail.com | linkedin.com/in/rohit-geddam-a67794316

PROFESSIONAL SUMMARY

Frontend-focused full-stack developer with 5+ years building responsive, secure enterprise web applications in React.js, Next.js, TypeScript and Node.js. Working exposure to finance and ERP domains through accounting, sales, procurement and buying-flow modules. Skilled in building reusable UI component libraries from Figma designs and integrating RESTful APIs. Works in Agile teams with product owners, backend developers and QA, owning code reviews, performance tuning and CI/CD. Extending UI framework skills to Angular. Brings 6 months of hands-on DevOps experience on AWS.

PROFESSIONAL EXPERIENCE

Senior React Developer, 8848 Digital LLP 06/2024 - Present
Mumbai, India

- Build responsive, data-driven enterprise web applications (Finance, HRMS, CRM modules) using React.js, Next.js and TypeScript on Frappe/ERPNext backends.
- Created a reusable UI component library and a standard Listing / New Form / Detail View screen pattern shared across modules, converting Figma designs into consistent, accessible interfaces.
- Delivered a bilingual English/Arabic (RTL) client portal with next-intl covering Finance, HRMS and CRM modules, including Finance buying flows (Service Order Request, Service Order); owned API integration, testing and PR merges, and produced deployment guides, change-request trackers and status reports for the client.
- Built a desktop accounting application (Electron, React.js, TypeScript, Redux) modeled on Tally-style workflows, with complete Sales and Procurement modules, a shared-hooks architecture and API layer, and typed state management.
- Integrate and test RESTful APIs and work with client product owners, backend developers and QA in Agile sprints through to production release.
- Apply security best practices, including route guarding, role-based access, CORS configuration and Cloudflare security rules for production apps.
- Set up CI/CD with GitHub Actions and deployed applications to AWS (EC2, S3, IAM, VPC) and Vercel, resolving build and infrastructure issues.

Software Engineer, Sugarlogger Technologies Pvt. Ltd. 02/2021 - 05/2024
Mumbai, India

- Developed customizable web solutions and SaaS platforms with React.js on the front end and Node.js / Express.js RESTful APIs with MongoDB and MySQL.
- Built online appointment booking and report delivery features for a healthcare patient portal, improving patient satisfaction by 10%; delivered 3+ new features and fixed critical bugs with a team of 4+ developers.
- Created reusable, user-centric front-end modules that streamlined workflows and cut delivery time by 30%.
- Deployed and maintained applications on DigitalOcean (Nginx, PM2, SSL, Cloudflare DNS); partnered with cross-functional teams on debugging and performance tuning to improve platform reliability.
- Mentored junior developers through code reviews and Agile practices, raising team productivity by 15%.

EDUCATION

Master of Computer Applications (MCA), Lovely Professional University 2022 - 2024
BSc Information Technology, University of Mumbai 2017 - 2020

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Electron, HTML5, CSS3, Angular (upskilling)

UI & Design: Reusable component libraries, Storybook, Tailwind CSS, Bootstrap, Chart.js, Figma, Responsive and RTL layouts

Backend & APIs: Node.js, Express.js, Python, Flask, Django, Frappe/ERPNext, RESTful APIs, GraphQL, Strapi, MongoDB, MySQL

Quality & Security: Cross-browser compatibility, Web performance optimization, Role-based access and route guarding, CORS, ESLint, Code reviews

DevOps & Cloud: AWS (EC2, S3, IAM, VPC, CloudWatch, Route 53), Docker, Kubernetes, Terraform, Ansible, Jenkins, GitHub Actions (CI/CD), Linux, Bash scripting, Nginx, PM2, Vercel, DigitalOcean, Cloudflare

Tools & Process: Git, Jira, Trello, Agile/Scrum
